Notice: Suurbraak Upgrading of Rising Main, Gravity Main and Ancillary Services

An upgrade at the Water Treatment Works in Suurbraak is currently taking place. Part of the upgrade is to connect the clean water reservoir to the new pump station. The contractor intends to do a live water pipe connection on Thursday, 09 September 2021 at the Suurbraak Water Treatment Works.

The connection will take place between 08h00 and 14:00 on 09 September 2021. No water interruptions are expected, but residents can expect decreased water pressure and flow.

Residents are advised to please use water sparingly whilst the connection takes place. Should the live connection not be successful, the Contractor will revert back to the old connection, which could result in a brief interruption in water supply to the lower part of Suurbraak.

The municipality will do its utmost to ensure that there is no interruption in service delivery.

We look forward to residents' patience, understanding and cooperation.

Municipal Manager
A.M. Groenewald
