1 INTRODUCTION

1.1 Goldwind Background

Goldwind is a China-based wind power company with a 21 years' experience in the renewable energy sector. Goldwind is a global leader in manufacturing wind turbine generators ("WTG") operating through three main segments: WTG manufacturing, wind power services, and wind farm investment and development. It is involved in the research and development, and manufacture of WTGs and wind power components; development and operation of wind farms; and provision of wind power-related consultancy, wind farm construction, maintenance, and transportation services.

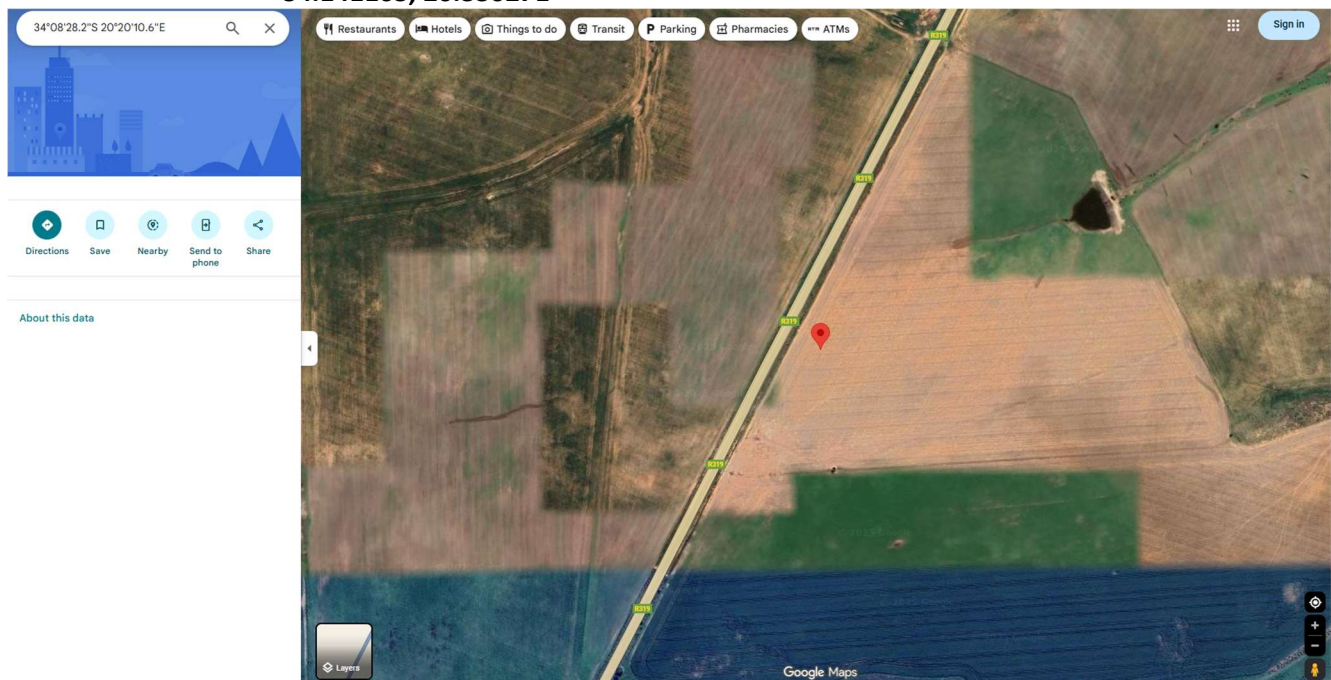

Goldwind represented by their South African operations located in Sandton has successfully executed 2 projects for South Africa's Renewable Independent Power Producer Procurement ("REIPPP") Round 4 projects as the Engineering Procurement and Construction ("EPC") contractor and is currently contacted in the role as Maintenance and Guaranteed Availability ("MGA") contractor for both facilities. The result of the projects are 152,5 MW electricity generation onto South Africa's electricity grid network.

1.2 The Requirement

Goldwind has been selected as preferred supplier for South Africa's REIPPP Round 5 responsible for the WTG's including manufacturing, international and local logistics, customs clearing erection, WTG electrical installation, and commissioning as part of the scope of works. Goldwind will be the service provider to provide the certain warranty, operation, and maintenance services with respect to wind turbine facilities for the project. Goldwind is seeking a service provider for **General Waste & Hazardous Waste disposal** Overberg Wind Farm Project situated approximately 25Km from Swellendam in the Western Cape Province.

Overberg Windfarm

1.3. Scope of Services:

Supply the following:

1. 1x 6 cubic meter Skip for General Waste
2. 1x 6 cubic meter Skip for Hazardous Waste Sealed Lidded
3. Please quote on 11 cubic meter or similar skips.

The skips will be placed at our camp site. We may require additional skips at other construction site locations.

1. Scope of General Waste

General Waste refers to waste material that does not pose an immediate hazard to human health or the environment.

- **Examples**
 - Office waste (paper, cardboard, packaging) 
 - Domestic-type waste from kitchens and canteens 
 - Non-contaminated plastics and glass
 - Non-hazardous construction debris
 - Collection and temporary storage in designated bins
 - Disposal at licensed municipal landfill sites
 - **Key Controls**
 - Clearly labeled bins
 - Regular collection schedules
 - Compliance with municipal waste regulations
-

2. Scope of Hazardous Waste

Hazardous waste refers to waste that poses a significant risk to health, safety, or the environment due to its chemical, biological, or physical properties.

Examples

- Chemicals and solvents 
 - Oils, fuels, and lubricants
 - Paints and thinners
 - Contaminated rags or absorbents
-

- Safe storage in approved containers
 - Proper labeling and documentation
 - Transport by licensed hazardous waste contractors 🚚
 - Disposal at approved hazardous waste treatment or disposal facilities
-
- Compliance with waste classification regulations such as the National Norms and Standards for the Assessment of Waste for Landfill Disposal.
-

3. Activities Included in the Scope

A comprehensive waste scope normally covers

- Waste identification and classification
 - Safe handling and storage
 - Safe Transportation
 - Authorised disposal and signed off authority of each deposit.
-

4. Areas Typically Covered

The scope may apply to:

- Site Camp
- Production or operational sites (If required)
- Storage areas (if required)
- Construction or project sites (if required)
